Aquatic Resources - Lake Mason - Adams and Marquette Counties - Inventory and Lake Management Plan	The objective of this study was to assess the water and land resources of Lake Mason, identify the water quality problems that are a result of these land and water uses, and develop a conservation and management plan to address these problems. The goal of this report is to increase the knowledge and understanding of the problems of Lake Mason, its watershed and associated water resources and work towards a land use ethic . The foundations of this goal have been built through this grant program by gaining private landowner cooperation in identifying these problems and expressing a desire to develop and accept a plan to solve them.	Lake Mason Improvement Association and Aquatic Resources	8/1/1992
