

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: AIRR-001-05

Name: POST LAKES P & R DISTRICT: Curly Leaf Pondweed Treatment/Clean Boats Clean Water Inspection

Type: Aquatic Invasives Grant

Subtype: Aquatic Invasives Early Detection and Response

Status: COMPLETE

Start Date: 2/28/2005

End Date: 12/31/2005

Purpose: The Post Lake P&R District will sponsor a project to chemically treat pioneer beds of curly-leaf pondweed in Upper Post Lake and the Wolf River above Post Lake. The District has been treating an 8 acre and .8 acre bed of CLP for 4 years and 1 year respectively. The District will hold meetings with waterbodies' associations to the north of Post Lakes in the Wolf River system (Pine and Little Rice Lakes) to coordinate a planning effort against CLP. Project updates will be given to the riparian owners via a quarterly newsletter and trained watercraft inspectors will monitor boat landings during peak weekends and holidays.

Products:

- 1) Two pioneer beds of curly-leaf pondweed will be treated in accordance with the Department issued chemical control permit.
- 2) Pre and post treatment surveys mapping the location and densities of CLP will be conducted.
- 3) District newsletter will be distributed to riparian property owners and DNR.
- 4) Inspectors will monitor boat landings during peak times and input daily totals from Form 3200-120 into the WI-DNR website. Diaries will be retained for at least three years.
- 5) Inspectors will deliver suspected AIS to Rhinelander WDNR Service Center for vouchering.
- 6) A final report will be made available to the DNR, Oneida and Langlade County Land Conservation Dept., local lake associations, districts, and media.
