

Wisconsin Department of Natural Resources

SWIMS Project Summary

General Project Information

Project ID:	CBSM_2
Name:	CBSM (Level 2)
Type:	Citizen Based Stream Monitoring
Subtype:	Regional or Statewide Coordination
Status:	ACTIVE
Start Date:	4/15/2006
End Date:	9/30/2006
Purpose:	The Water Action Volunteers Program involves citizen monitors in the process of collecting water quality data used by the DNR to assist in making management decisions. Goals of the program include collecting high quality data that can be used for management decisions, building relationships between DNR staff and citizen monitors, and assessing areas in need of additional monitoring, restoration and/or protection. Ultimately, volunteer participation in this project aids DNR staff by allowing for increased capabilities to monitor streams. Communities and the DNR can use this water quality information to make decisions that affect the management of streams throughout Wisconsin.
Objective:	Data collected by Water Action Volunteers can be used by DNR staff as screening tools. The process of data collection helps Wisconsin citizenry enhance their understanding of data collection and in many cases, move to more sophisticated data collection work including biological and additional physical site data..
Comments:	
Outcome:	
Study Design:	<p>The Level 2 stream monitoring sampling plan is consistent with statewide baseline monitoring guidelines laid out in the DNR's Water Resources Monitoring Strategy for Wisconsin.</p> <ul style="list-style-type: none"> • DNR or county staff recommends sites that could be useful to have monitored based on needs to acquire status or trends information, or other types of monitoring that is priority. • Volunteers are asked to monitor, at least, from May through September • Volunteers choose primary (P) and secondary (S) sampling dates in advance and note on their data sheets on which of those dates they monitored. • Volunteers are asked to sample on the primary date unless there are safety concerns about being at the stream site (e.g., tornado, lightning, dangerously high flows) or a family emergency. • The goal is to monitor at the same time each month, preferably 30 days apart from the last monitoring visit. • Volunteers are instructed to enter data by the end of each month. <p>Parameters Measured:</p> <ul style="list-style-type: none"> • Dissolved oxygen (concentration) • Dissolved oxygen (saturation) • Transparency • Temperature (instantaneous and continuous measurements) • pH.
QA Measures:	Program Coordinator or Local Coordinators visit with 10% of volunteer stations annually to conduct side-by-side monitoring of dissolved oxygen and pH, using his/her own meter to check that volunteers are calibrating meters and following methods correctly, to ensure the equipment is functioning properly, and to answer any questions or concerns. The Data Managers run monthly database queries throughout the field season to evaluate the quality of data entered into the database and follow-up with volunteers to address anomalies that are identified.

Actions

Action	Detailed Description	Start Date	End Date	Status
Citizen-Based Stream Monitoring	Collect chemical, physical, and/or biological water quality data to assess the current overall stream health. The data can inform management decisions and may be used to identify impaired waters for biennial lists.	4/15/2006	9/30/2006	IN_PROGRESS

Monitoring Stations

Station ID	Name	Comments
10010558	Honey Creek 16 - at bridge N of Aurora Hospice
