

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: Dane County WQMPlan_FY15

Name: Dane County WQM Plan FY15

Type: Water Quality Planning

Subtype: Water Quality Management Plans

Status: COMPLETE

Start Date: 7/1/2014

End Date: 6/30/2015

Purpose: Water Quality Planning Work Program. The work program reflects a continuing water quality planning program directed primarily at the essential sewer service area, environmental corridor and point source facility planning needs, and urban storm water management assistance. The total cost of the proposed 2014-2015 work program. activities is estimated to be \$169,725 as shown in the budget table. We would propose to undertake these activities with a combined GPR/604b grant and local match. We have shown a grant amount of \$85,000 which represents a funding level of nearly 50 percent.

Work elements 3141, 3142, and 3143 are required continuing point source and service area water quality planning activities that we must perform as part of our continuing water quality planning work, and matching funding to support these activities is essential. Work element 3141 will include adoption of the update of Appendix C of the Dane County Water Quality Plan (Point Source Inventory and Analysis) last updated in 2004, and needing to be updated based on 2010 Census data and new 2040 population projections for all service areas.
