

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: NKE9

Name: Horse Creek PWS Plan - Nine Key Element Plan

Type: Water Quality Planning

Subtype: Priority Watershed Plan

Status: COMPLETE

Start Date: 6/1/2001

End Date: 12/31/2019

Purpose: The Horse Creek Priority Watershed Project plan assesses the nonpoint sources of pollution in the Horse Creek Watershed and guides the implementation of nonpoint source control measures. These control measures are needed to meet specific water resource objectives for the Horse Creek Priority Watershed. The purpose of this project is to reduce the amount of pollutants originating from nonpoint sources that reach surface water and groundwater within the project area.

Objective: The primary objective of the project is to reduce nonpoint source pollution to the surface water and groundwater, and to enhance and protect the water quality of streams in the Horse Creek Watershed.

Comments:

Outcome: The project goals are to maintain and protect shoreline buffers, reduce total phosphorus in several lakes, maintain and protect water quality, reduce in-stream sedimentation and in-stream habitat loss, and form a lake association or district in cooperation with all the lakes in the watershed.
