Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: NKE27

Name: Upper St. Croix - Eau Clair Rivers PWS Plan - Nine Key Element Plan

Type: Water Quality Planning

Subtype: Priority Watershed Plan

Status: COMPLETE

Start Date: 6/1/1997 **End Date:** 12/31/2018

Purpose: The Upper St. Croix - Eau Clair Rivers Priority Watershed is at the headwaters of the St. Croix River and the Mississippi River

system. The historical significance of this resource is well documented in many accounts referring to the beauty and abundance of this outstanding resource. In 1988, the St. Croix River was designated as an Outstanding Resource Water by the State of Wisconsin. The Upper St. Croix - Eau Clair Rivers watershed project has a protection orientation, as opposed to the more traditional remediation based watershed projects, and takes a proactive approach to prevent nonpoint pollution

before it happens.

Objective: The primary objective of the project is to reduce nonpoint source pollution to the surface water and groundwater, and to

protect the water quality of streams in the Upper St. Croix - Eau Clair Rivers Watershed Project area.
