

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: Honey Cr TMDL

Name: Honey Creek TMDL (EAP)

Type: TMDL/303d Projects

Subtype: Determine Pollutants or Impairments

Status: COMPLETE

Start Date: 8/27/2006

End Date: 12/31/2099

Purpose: Monitor Honey Creek for habitat impairment caused by sedimentation. Conduct fisheries IBI and habitat assessment Honey Creek (3 sites) and one site on each of 3 major tributaries. Conduct monthly nutrient analysis (12) of Honey Creek below WWTP outfall. Conduct watershed assessment to determine sediment sources. Conduct macroinvertebrate analysis at 6 sites.
When: July 06-June 07
Where: Honey Creek (3 sites); Whitehead Creek; Spring Creek; Hawthorne Creek
Who: Jim Amrhein \0096 Water Resources Specialist

Objective: Need to complete a TMDL on the habitat impairment which is the reason the stream is on the 303(d) list. This was one of the five regional projects submitted for TMDLs as required. This project will hopefully result in corrective management actions.

Comments: spring creek: 892800 no stations listed in swims. hawthorne - 893200, no stations listed in SWIMS.

Outcome: This study will involve fisheries IBIs and habitat indices at 3 sites (to complement the 3 sites already assessed) as well as 1 site on each of 3 major tributaries to determine contemporary status and biological potential.

Macroinvertebrate samples (3 sites on Honey Creek and 1 on each of 3 major tributaries).

Nutrient samples downstream from the Monroe Sewerage Treatment Plant to determine if nutrient loading and resulting algal growth is affecting habitat and biota.

Report summarizing findings to be completed by March, 2008
