

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: BR03_WTPLAN

Name: Big and Douglas Creeks (BR03) Watershed Planning

Type: Water Quality Planning

Subtype: Targeted Watershed Plans

Status: INACTIVE

Start Date: 6/20/2013

End Date: 12/31/2099

Purpose: Watershed specified for planning and assessment purposes. Assessment of water quality condition in this respective county will use protocols described in WisCALM of the year of assessment. Minimum assessment work includes biological data (macroinvertebrates, fish indices), chemistry and habitat data. Additional work includes identification of priorities and goals, creating recommendations for actions, and updating narratives for watersheds and waterbodies. Assessments are to be double checked by at least one additional biologist.

Actions

Action	Detailed Description	Start Date	End Date	Status
Citizen-Based Stream Monitoring	Monitoring of phosphorus concentrations in the streams of the Big-Douglas and Rathbone-Soper Creeks areas should continue as funding and volunteer efforts allow.	6/20/2013	12/31/2099	PROPOSED
Protect Riparian or Shorelands	In areas with heavy grazing, managed grazing and rotational grazing could be implemented to protect riparian corridors. Other agricultural practices and nutrient management plans could help reduce erosion and runoff to streams.	6/20/2013	12/31/2099	PROPOSED
Monitor Aquatic Biology	Follow up monitoring should be completed on streams with poor IBI scores or lack of fish to further evaluate conditions.	6/20/2013	12/31/2099	PROPOSED
Habitat Restoration - Instream	Habitat improvements could be implemented on streams that have documented steep eroding banks if funding becomes available.	6/20/2013	12/31/2099	PROPOSED
Monitor Targeted Watershed Area (TWA)		1/1/2014	12/31/2016	COMPLETE
Monitor Stressor Identification		10/13/2017		COMPLETE
Monitor or Propose 303(d) Listing		10/13/2017		PROPOSED
