

## Wisconsin Department of Natural Resources SWIMS Project Summary

### General Project Information

**Project ID:** SPL37516

**Name:** DANE COUNTY: Crystal Lake Water Level Monitoring Station

**Type:** Lakes Grant

**Subtype:** Small Scale Lake Planning

**Status:** COMPLETE

**Start Date:** 2/15/2015

**End Date:** 12/31/2016

**Purpose:** Dane County is sponsoring a project to install a water level monitoring station on Crystal Lake, Dane County. This will provide useful data for lake water budgets to assist with management of the pump located on this lake.

Project final deliverables include: The station will be installed, and graphs of real-time data will be available for viewing by the public online. In addition, a report and website link for the data will be provided to DNR as a deliverable.

Specific project activities include: Installing a water level monitoring station at the lake, setting up the computer programming, and a resulting website display.

Special Conditions: Not applicable.

This scope summarizes the project detail provided in the application and does not negate tasks/deliverables described therein. Data, records, and reports, including GIS-based maps, and digital images, must be submitted to the Department in a format specified by the regional Lake Biologist.

If consultant is to provide final report, it is recommended that Grantee provide DNR Lake Coordinator with a draft for comment on report adequacy prior to making final payment to the consultant. DNR to receive both paper and electronic .pdf copies of the final report along with, or prior to submission of grantee's final payment request.

**Objective:****Comments:** Grantee is DANE COUNTY**Outcome:****Study Design:****QA Measures:**

Crystal Lake Monitoring System	<p>A real-time monitoring station was installed to provide water level and temperature data for Crystal lake. Previously, water levels were recorded by manual measurement and occurred at approximately a monthly time step. Past data is not real time, required manual work, and measurements are sporadic throughout the year. This project solves those issues and provides continuous data through the year.</p>
