

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: LPL158816

Name: WHITE ASH LAKE P & R DISTRICT: Update White Ash Lakes Aquatic Plant Management Plan

Type: Lakes Grant

Subtype: Large Scale Lake Planning

Status: COMPLETE

Start Date: 2/15/2016

End Date: 12/31/2017

Purpose: White Ash Lake P&R District is sponsoring a project to update an Aquatic Plant Management (APM) Plan for North White Ash and White Ash Lakes.

The final deliverables include plant survey data and report, agendas and minutes for planning meetings, and an APM plan that meets the requirements of NR 109.09.

Special Conditions: 1) WDNR\2019s Aquatic Plant Management in Wisconsin guidance shall be followed for point-intercept survey monitoring and aquatic plant management plan development; 2) The NOR Native Plant Protection Strategy shall be integrated into the APM plan; 3) Sponsor shall contact DNR immediately if a new AIS is found.

This scope summarizes the project detail provided in the application and does not negate tasks/deliverables described therein. The grant sponsor shall submit all data, records, and reports, including GIS-based maps and digital images, to the Department in a format specified by the regional Lakes Biologist.

White Ash Lake APM Plan (Draft)	The White Ash Lake Protection and Rehabilitation District (The District) was formed in 1976 to address resource management concerns on White Ash and North White Ash Lakes. The District has been active in a number of lake management activities on White Ash and North White Ash Lakes including aquatic plant management, invasive species monitoring and control, habitat improvements, boat landing monitoring and community education activities. The District contracted Flambeau Engineering, LLC. to update the aquatic plant management (APM) plan for White Ash and North White Ash Lakes. The White Ash and North White Ash Lakes APM Plan includes a review of available lake information, aquatic plant surveys, fishery assessment, water quality evaluation and an evaluation of current management techniques. The APM plan recommends specific management activities for aquatic invasive species (AIS) in the lake systems, which are discussed below.		Tiffiney Kleczewski	5/1/2017
