DNR Press Release: Indian Lake carp removal project tentatively scheduled for week of October 15	The Wisconsin Department of Natural Resources in cooperation with the Dane County Land and Water Resources Department will implement a project to remove common carp and restore the fishery of Indian Lake in the town of Berry in Dane County. This project is tentatively scheduled for the week of Oct. 15, 2018 assuming favorable weather conditions.	Dan Oele, David Rowe, Pete Jopke	10/1/2018	
Rehabilitation of Indian Lake, Dane County Wisconsin	The 2018 treatment appeared to meet the desired results of eradicating common carp and lessening the black bullhead population. The Dane County LWRD and the DNR will continue to monitor the fishery in the coming years and will assess the efficacy of the treatment during the 2019 field season. Stocking plans call for bluegill, largemouth bass, yellow perch and channel catfish. With the addition of the new restrooms and shelter, kids climbing wall, the ADA fishing pier and ever popular dog park, the future of Indian Lake is positive.
