

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: CARPC Stoughton USA SSA Plan

Name: Stoughton Urban Service Area CARPC

Type: Water Quality Planning

Subtype: Sewer Service Area Plans

Status: ACTIVE

Start Date: 1/1/1995

End Date: 4/5/2099

Purpose: The Stoughton Urban Service Area was first delineated in the early-1970s when the Dane County Regional Planning Commission originally adopted its first Land Use Plan. The first amendment to the Stoughton Service Area occurred in 1985 to delineate Environmental Corridors and ensure the SSA boundaries reflected the City's adopted 1984 master plan. This amendment resulted in a net reduction of 450 acres. There has been a total of 9 amendments to this urban service area since its creation totaling 175 net acres of developable land and a net reduction of Environmental Corridor acres. Environmental Corridor in the SSA currently totals 848 acres. The most recent amendment of the service area by the City of Stoughton was recommended by the Commission and approved by the Wisconsin DNR in 2021.

Actions

Wisconsin Department of Natural Resources SWIMS Project Summary

Action	Detailed Description	Start Date	End Date	Status
Sewer Service Area Planning	The City of Stoughton is requesting amendment to the Stoughton USA. The area is located at the northwestern corner of the City, abutting Town of Dunn, Town of Dunkirk, and Town of Rutland. The majority of the area is currently within the City. Three town islands currently exist in the amendment area: a roughly 1.5-acre parcel in the Town of Rutland and two parcels totaling around 14 acres in the Town of Dunkirk. The amendment area is split in half by USH 51. Existing land use is primarily agriculture, woodlands, other open lands, and single-family. Proposed land use to the east of USH 51 includes large-scale multi-family and duplex residential, open space/park, and stormwater management. Proposed uses immediately west of USH 51 include commercial and stormwater management, while large and small-scale multi-family residential, single-family residential, open space/park, and stormwater management uses are proposed further west.	1/1/1995	4/5/2099	IN_PROGRESS
