### Actions

Action	Detailed Description	Start Date	End Date	Status
Protect Riparian or Shorelands	Ensure that the wooded area adjacent to, and above, Site R6 be maintained as a green corridor so the high quality conditions that were found there can be continued.	1/1/2006		VERIFY
Wastewater Monitoring or Management	The WWTF discharge remain below the high quality area of Site R6 (preferably that it stays in the area it is in between Sites R7 and R8 (see Reif, 2006).	1/1/2006		VERIFY
Protect Headwaters and Springs	Ensure groundwater pressure that works the springs to Section III be maintained -- ensure that confining layer above the ledge is not punctured during any construction.	1/1/2006		VERIFY

## Wisconsin Department of Natural Resources SWIMS Project Summary

Restore Hydrology, Morphology	Section III has significant problems. The ditched area below E. Rose Bd. Rd. resulted in very poor habitat with little conditions for quality macroinvertebrates or quality fishery. There was a small dam in Site R6 that could have been a boundary for fish migration. Also, the impoundment above Site R5 was a clear boundary to fish migration. A restoration of the habitat in the ditched area at and below Site R8 and elimination of the impoundment would result in a seasonal potential classification of WWGF in Sections II and III and could provide migration in the spring to the wetland area above the Village of Rosendale.	1/1/2006		VERIFY
Monitor or Propose ORW or ERW	Rosendale Trib. Section III Stretch of Trib. is requested for inclusion as an ERW.	1/1/2006		VERIFY
