## **General Project Information**

Type:   Clitzen Based Stream Monitoring     Subtype:   Volunteer Monitoring     Subtype:   Volunteer Monitoring     Status:   COMPLETE     Status:   COMPLETE     Status:   Signal     Purpose:   The Water Action Volunteers Program (WAV) involves citizen monitors in the collection of stream water quality data that may be used by the Wisconsin Department of Natural Resources (DNR) and their partner organizations. Program goals include building relationships between DNR staff and citizen monitors while assessing streams in need of additional monitoring water quality information that may be used by the Wisconsin. Connected: Objectives of the program are to educate and empower citizens acpabilities of the DNR and communities to monitor streams, providing water quality ander quality parameters, and in many cases, interestisting with more sophisticated projects, including the collection of additional biological, chemical, and physical site data. Ultimately, outgoal is streams threi data, to obtain high quality data that may be used to make decisions that affect the management decisions.     Conternet:   Statf trust volunteer data results, and therefore utilize WAV data to assist in making management decisions.     Staty Design:   Volunteer stream monitors as sess water quality parameters, and in many cases, interesting with monitoring Strategy for Wisconsin. Volunteers are asked to acquire status or trust dinformation, or there types of monitoring Strategy for Wisconsin. Volunteers are asked to acquire status or trust dinformation, and there types of monitoring Strategy for Wisconsin Department of stream strategy acount as asket to acqui	Project ID:	CBSM-1001	12485								
Subtype:     Volunteer Monitoring       Status:     COMPLETE       Status:     COMPLETE       Status:     S/3/2006       End Date:     12/31/2009       Purpose:     The Water Action Volunteers Program (WAV) involves citizen monitors in the collection of stream water quality data that may be used by the Wisconsin Department of Natural Resources (DNR) and their partner organizations. Program goals include building relationships between DNR staff and citizen monitors while assessing streams in need of additional monitoring, restoration, and/or protection. Ultimately, volunteer participation increases capabilities of the DNR and communities to monitor streams, providing water quality information that may be used to make decisions that affect the management of streams throughout Wisconsin.       Subjective:     The main goal of the WAV program is to preserve and protect Wisconsin's streams and the lakes to which they are connected.
