

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: AIRR-047-08

Name: CHUTE LAKE P & R DISTRICT: Chute Pond EWM Control Project

Type: Aquatic Invasives Grant

Subtype: Aquatic Invasives Early Detection and Response

Status: COMPLETE

Start Date: 4/1/2008

End Date: 12/31/2009

Purpose: The Chute Lake Protection and Rehabilitation District proposes to control Eurasian water-milfoil (EWM) in Chute Lake by implementing control measures during the period 2008. The project elements and deliverables are specified in the Chute Lake Protection and Rehabilitation District's Aquatic Invasive Species Rapid Response Grant application, dated June 25, 2008. The project includes conducting pre- and post-treatment surveys and mapping the extent of EWM; controlling EWM with aquatic herbicide treatments; and implementing an aquatic invasive species prevention strategy that includes developing an information & education program that entails two educational newsletters and press releases via Chute Lake's personal website. In addition, at the district's annual meeting CBCW volunteers will be solicited. A final report summarizing the one-year project will be provided to DNR. If consultant is to provide the final report, it is recommended that the Grantee provide the DNR Aquatic Invasive Species Coordinator with a draft for comment on report adequacy prior to making final payment to the consultant. DNR will be provided both paper and electronic .pdf copies of the final report along with, or prior to, submission of grantee's final payment request.
