

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: LPL-1296-09

Name: CLARK COUNTY LAND CONSERVATION DEPT: Mead TMDL Implementation

Type: Lakes Grant

Subtype: Large Scale Lake Planning

Status: COMPLETE

Start Date: 4/1/2009

End Date: 12/31/2011

Purpose: The Clark Co. Land Conservation Dept., in cooperation with the Mead Lake Watershed Stakeholder Leadership Team (SLT), proposes to pursue changes within the watershed to reduce phosphorus loading in Mead Lake in Clark County to levels identified in a recent Total Maximum Daily Load (TMDL) study. Major project elements to include: a) Watershed survey and social marketing study, b) Development of Lake Management Plan.

Objective:

Comments: Grantee is CLARK COUNTY LAND CONSERVATION DEPT

Mead Lake Management Plan	Many studies on Mead Lake in recent years have looked at aquatic plants, invasive species, shore land habitat and erosion, fisheries, and sanitary sewer systems. These studies demonstrated the need for an organized effort to address water quality and other concerns at Mead Lake. As the Partnership began to discuss these concerns, it became clear that a Lake Management Plan was a necessary first step towards addressing them. Mead Lake is considered highly eutrophic (nutrient-rich), and the lake has been listed on Wisconsin's 303d list of impaired waters in 1998 due to sediment and phosphorus.	The Mead Lake and Watershed Partnership	3/1/2010
