

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: RM-044-10

Name: ROCK RIVER COALITION, INC: Rock River & Horicon Marsh Volunteer Initiative

Type: River Grant

Subtype: River Protection Grant

Status: COMPLETE

Start Date: 7/1/2009

End Date: 12/31/2011

Purpose: The Rock River Coalition, Inc., partnering with USGS, USFWS, the City of Horicon and WDNR will conduct a water quality monitoring project to determine if conservation practices installed since 2000 in the Upper Rock River Basin watershed has resulted in measureable improved water quality, provide a current baseline of water quality to assess changes occurring after 2009, foster citizen involvement and train citizen monitors in sample collection. The project will: 1) collect and analyze nutrient and sediment samples from two tributary streams and the outlet of Horicon Marsh; 2) compile an analysis of point and non-point source practices installed since 2000; 3) compare the new data to data collected in a similar study done in 1998 and 1999 to determine if water quality improvements have occurred. Along with a final report, project deliverables include: 1) an assessment of nutrient and sediment loading to the Horicon Marsh; 2) an assessment of effectiveness of point and non-point pollution reduction practices to reduce pollutant load to the marsh; and 3) provide data to help determine the accuracy of the TMDL modeling that will be done as part of the Rock River Basin TMDL project.

Objective:

Comments: Grantee is ROCK RIVER COALITION, INC
