

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: LPL-1381-10

Name: LAKE ALICE ASSOCIATION, INC: Lake Alice Stewardship Program Phase II - Understanding the Biota of Lake Alice

Type: Lakes Grant

Subtype: Large Scale Lake Planning

Status: COMPLETE

Start Date: 4/1/2010

End Date: 6/30/2011

Purpose: Lake Alice Association is sponsoring phased large scale lake planning grants to study Lake Alice, in Lincoln County. The project will focus on developing and updating an Adaptive Lake Management Plan (LMP) for Lake Alice. Phase 2 was funded in this grant cycle and Phases 3-5 will be submitted for funding starting in 2011.

Project activities for Phase 2 include: 1) Educational program, meetings and educational events with lake association and Tomahawk High School students, written educational materials, news releases, and website updates; 2) Point-intercept (PI) aquatic plant survey; 3) Aquatic plant community and substrate mapping; 4) Water quality assessment; 5) Volunteer amphibian monitoring and angler survey; 6) Update LMP.

Project deliverables include: 1) Educational materials and news releases; 2) Aquatic plant community and substrate maps; 3) PI, water quality, amphibian, and angler data; 4) LMP.

Specific conditions for this project: LMP needs Dept review and approval

WDNR Lakes Management Coordinator will be provided with an electronic (pdf or word) and hard copy of LMP, news releases, any other educational materials/products, all data, all maps from project, and all GIS data.

Wisconsin Department of Natural Resources SWIMS Project Summary

Title	Description	Author	Published	Comments
Lake Alice Stewardship Program Adaptive Management Plan: Phase 2 - Understanding the biota of Lake Alice and Aquatic Plant Management Plan	The Lake Alice Stewardship Program is an ongoing endeavor composed of periodic phases that progress toward the overall vision of the Lake Alice Association; a healthy, sustainable Lake Alice. In Phase 1, participants learned about the lake and the landscape. In Phase 2, a principal task involved conducting an aquatic plant survey and creating an aquatic plant management plan. Phase 2 tasks also included frog and toad surveys and a volunteer angler journal. Success of future phases depends on a coalition of participants, each carrying out appropriate tasks and communicating needs and findings to other team members. It is appropriate that the Lake Alice Association (LAA) is the lead organization in this long-range endeavor.	Dean Premo, White Water Associates, Inc.	5/25/2011
