

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: LPT-418-11

Name: VILLAGE OF BELLEVILLE: LMI-Lake Belle View Restoration Project

Type: Lakes Grant

Subtype: Lake Protection Grant

Status: COMPLETE

Start Date: 7/1/2010

End Date: 12/31/2010

Purpose: The Village of Belleville proposes, as part of a whole-lake restoration project, to separate Lake Belle View from the Sugar River by construction of an earthen berm on the western side of the lake. This separation berm will result in a vast reduction in the amount of water from the Sugar River in the lake's water budget, and therefore will result in water quality and habitat improvements from reduction in nutrients and carp. The deliverable from this project will be a final report summarizing the project, with photos. The final report will be submitted to the department and placed in the local public library.

Objective:

Comments: Grantee is VILLAGE OF BELLEVILLE

Outcome:

Study Design:

QA Measures:
