

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: GLRI_00E00698-0

Name: Establishment of Regional Rapid Method Test Facilities in WI

Type: Great Lakes Restoration Initiative

Subtype: Nearshore Health and NPS

Status: ACTIVE

Start Date: 10/1/2010

End Date: 12/31/2099

Purpose: This project would expand existing (Racine and/or Milwaukee Counties) and establish new rapid test method labs in the Lake Superior region (serving Ashland, Bayfield, Douglas, and Iron Counties), Door County (Serving Brown, Door, and Kewaunee counties), and Manitowoc (serving Manitowoc and Sheboygan counties). This project would provide all infrastructure required including all equipment and training needed to start using the qPCR rapid test methods. By leveraging current testing facilities (Ashland, Sturgeon Bay, Manitowoc, Racine, and Milwaukee) and using this capital investment all of Wisconsin's coastal waters would be able to get beach testing results within 4 hours.

Objective: This project would expand existing and establish new rapid test (e.g. qPCR) method labs so that all of Wisconsin's coastal waters would be able to get beach testing results within 4 hours. This capability would be unprecedented anywhere in the country.
