

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: GLRI_00E00599-0

Name: Shorewood Atwater Beach - Sewage Contamination Prevention

Type: Great Lakes Restoration Initiative

Subtype: Nearshore Health and NPS

Status: ACTIVE

Start Date: 10/1/2010

End Date: 12/31/2099

Purpose: Investigate & eliminate sewage leakage into storm sewers, thereby achieving immediate removal of human waste from Lake Michigan in general & Atwater Beach in particular.

Objective: The Village of Shorewood asked the University of Wisconsin WATER Institute to conduct a beach quality monitoring program. The research showed that the storm outlets to Lake Michigan in the vicinity of Atwater Beach are contaminated with human waste, mostly in wet weather, but also in dry weather. The existence of leakage from sanitary sewers into the storm sewers is thus established. The project consists of investigating and eliminating sewage leakage into storm sewers, thereby achieving immediate removal of human waste from Lake Michigan in general and Atwater Beach in particular.
