

Wisconsin Department of Natural Resources  
SWIMS Project Summary

General Project Information

**Project ID:** AEPP-256-11

**Name:** TOWN OF LA VALLE: Working Together to Monitor AIS

**Type:** Aquatic Invasives Grant

**Subtype:** Aquatic Invasives Education

**Status:** COMPLETE

**Start Date:** 10/1/2010

**End Date:** 12/31/2011

**Purpose:** The Town of LaValle would like to conduct education, monitoring, and planning for AIS in order to prevent new exotic species from reaching either of the town\2019s two lakes, Dutch Hollow Lake and Lake Redstone. Presentations about AIS will be made to residents and nearby high schools, where students will create infomercials for local media and boat landings and the town\2019s website. A Clean Boats-Clean Waters program will be enhanced at Dutch Hollow Lake, and begun at Lake Redstone, using volunteers. A lake use survey will also be conducted to assess the AIS threat. Interested participants will also identify and map current areas of known populations of extant AIS species, and students will generate a report to provide suggestions for future monitoring and prevention, presenting their findings to the lake District boards and the Town. A professional report detailing goals and outcomes of the grant will be produced. Education, planning and monitoring will continue through 2011.

**Objective:**

**Comments:** Grantee is TOWN OF LA VALLE

**Outcome:**

**Study Design:**

**QA Measures:**

Students from Reedsburg High School Collect Plant Samples on Lake Redstone	Students from Reedsburg High School AP Environmental Science class collect plant samples and water chemistry data on Lake Redstone	Town of LaValle	2/9/2012	
Town of LaValle Aquatic Invasive Species Education, Prevention & Planning Grant Working Together To Monitor Aquatic Invasive Species WDNR Grant Final Report 2011	The Town of LaValle Aquatic Invasive Species (AIS) Grant project focusing on the education, prevention and planning regarding aquatic invasive species in two lakes, Dutch Hollow Lake and Lake Redstone, commenced late in the summer of 2010 and ended on December 31, 2011. The purpose of this project was to proactively address the growing concern over the threat of aquatic invasive species by spreading awareness on these issues among the public, especially lake users, as well as provide educational opportunities to area high school students and their teachers.
