

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: AEPP-266-11

Name: CHETEK LAKES PROTECTION ASSOCIATION: Chetek Chain of Lakes APM Planning & Water Quality Improvement

Type: Aquatic Invasives Grant

Subtype: Aquatic Invasives Education

Status: COMPLETE

Start Date: 10/1/2010

End Date: 12/31/2012

Purpose: Chetek Lks Protection Assoc. is sponsoring a project to complete aquatic plant surveys on 5 lakes; initiate watercraft inspection & AIS monitoring on 4 lakes; coordinate AIS I&E activities; monitor in-lake & tributary water quality; include stakeholder participation & planning, resulting in lake management implementation plans.

Project tasks/deliverables: 1) Early season Curlyleaf pondweed survey & summer point-intercept (PI) surveys of all plants with two sets of vouchers; 2) Review & inclusion of previous water quality & watershed studies; updated lake response monitoring; 3) Water quality goal development; 4) DO meter purchase; 5) Lake user/sociological survey; 6) Watershed Clean Boats Clean Waters program & data entry; 7) I&E program, including shoreline demonstration project with examples of results.

Special Conditions: 1) Sponsor & consultant must communicate with region/bureau TMDL, WAV & CLMN staff to advise, review, & coordinate proposed water quality monitoring & watershed assessment work before it starts; 2) A technical advisory committee including DNR & county partners should be engaged throughout the project's duration; 3) WDNR\2019s Aquatic Plant Management (APM) in Wisc. guidance should be followed for PI survey monitoring & APM plan development; 4) The WDNR APM Strategy (2007) will be utilized in Plan development; 5) Draft public surveys must be reviewed/approved by DNR; 6) Properties using grant funds for shoreline restoration implementation require DNR approved restrictive covenants permanently establishing a parcel vegetative buffer. Restorations will follow standards in NR 191.24(3) unless mutually agreed to in writing with lake coordinator before implementation.

This scope summarizes details provided in the application & does not negate anything described therein. Data, records, reports, & education materials, including GIS-based maps & digital images, must be submitted to DNR in a format specified by the lake coordinator.

Objective:

Comments: Grantee is CHETEK LAKES PROTECTION ASSOCIATION

Wisconsin Department of Natural Resources
SWIMS Project Summary

Title	Description	Author	Published	Comments
2012-2017 Aquatic Plant Management Plan for the Chetek Lakes	This plan supports sustainable practices to protect, maintain and improve the native aquatic plant community, the fishery, and the recreational and aesthetic values of the lakes. This plan also lays out a strategy to prevent the introduction of new aquatic invasive species (AIS) like Eurasian watermilfoil (EWM) not currently found in the lakes, and lays out a monitoring program to aid in early detection of any new AIS. Although considered a five-year plan for management, it is not intended to be a static document; rather, it is a living document which will be evaluated on an annual basis and can be revised to ensure goals and community expectations are being met.
