Aquatic Plant Management Plan – Mable Lake	This APMP addresses Mable Lake. Despite this specificity, it maintains the waterscape perspective crucial to effective lake stewardship. This is especially important when it comes to preventing introduction and establishment of aquatic invasive species (AIS). This APMP also addresses a population of an aquatic invasive species (AIS). The aquatic invasive plant Eurasian water-milfoil was first documented in Mable Lake in 2010.	White Water Associates, Inc.	12/1/2016
