

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: LW22_WTPLAN

Name: Narrows Creek and Baraboo River (LW22) Watershed Planning

Type: Water Quality Planning

Subtype: Targeted Watershed Plans

Status: COMPLETE

Start Date: 7/1/2010

End Date: 6/30/2011

Purpose: Watershed plan update 2011. This watershed lies entirely within Sauk County. It includes the portion of the Baraboo River from Reedsburg to the west edge of Baraboo. Smallmouth bass fishing is considered a valuable asset to the watershed.

The majority of the watershed is agricultural. Dairy farming is the dominant agricultural activity. Other major land cover in the watershed includes broad-leaf deciduous forest and grassland. There are a few wetland areas in the watershed.

Objective:

Comments:

Outcome:

Study Design: Watershed specified for planning and assessment purposes. Assessment of water quality condition in this respective county will use protocols described in WisCALM of the year of assessment. Minimum assessment work includes biological data (macroinvertebrates, fish indices), chemistry and habitat data. Additional work includes identification of priorities and goals, creating recommendations for actions, and updating narratives for watersheds and waterbodies. Assessments are to be double checked by at least one additional biologist.
