

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: LM Phosphorus Load

Name: Lake Michigan Phosphorus Loading

Type: Targeted Monitoring

Subtype: Special Project

Status: ACTIVE

Start Date: 1/1/2006

End Date: 12/31/2011

Purpose: Lake Michigan Phosphorus Loading Study is designed to study Phosphorus loads to Lake Michigan from major tributaries. Approximately 24 samples are collected on a flow weighted basis from 5 major tributaries. Rivers included in the study are the Menominee, the Fox, the Manitowoc, the Sheboygan and the Milwaukee.

Objective: The objective is to have long term information about the trends in phosphorus loading to Lake Michigan from the rivers contributing the majority of the phosphorus.

Comments:

Outcome: Data collection began in 2006. We are working with the USGS to calculate initial phosphorus load calculations for the tributaries included in the study.

Study Design:

QA Measures:
