

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: NPSEVAL

Name: Polluted Runoff Grants

Type: NPS Grant

Subtype:

Status: ACTIVE

Start Date: 1/1/1960

End Date: 12/31/2099

Purpose: The project was completed in order to reduce total suspended solids and attached pollutants from an existing development that eventually drains into the Koshkonong Creek in order to meet the City's WPDES permit. The result of this project removes ~ 12 tons/year putting the City at 41.5% removal of total suspended solids. In addition, this project turned a mowed turf grass area into a detention facility with native grasses and wild flowers. When fully established, these plantings will provide a better habitat for wildlife and promote some infiltration.

Objective: Construct a wet stormwater management facility in a City-owned parcel north of Batz Pond in the Renstone Greenway. The basin will serve to reduce total suspended solids and attached pollutants from an existing development that eventually drains into the Koshkonong Creek.

Comments: Sun Prairie, City-Renstone Greenway
