

## Wisconsin Department of Natural Resources SWIMS Project Summary

### General Project Information

**Project ID:** AIRR-131-13

**Name:** KELLY LAKE ADVANCEMENT ASSOC: Kelly Lake EWM Response Project

**Type:** Aquatic Invasives Grant

**Subtype:** Aquatic Invasives Early Detection and Response

**Status:** COMPLETE

**Start Date:** 7/1/2012

**End Date:** 6/30/2015

**Purpose:** Kelly Lake Advancement Association proposes to control Eurasian Watermilfoil in Kelly Lake by implementing control measures during the period 1012-2015. The project elements and deliverables are specified in the Kelly Lake Advancement Association\2019s Aquatic Invasive Species Control Grant application date November 28, 2012. The project includes conducting a spring pre-treatment survey and a summer peak biomass post-treatment survey in 2013 and 2014 by a third-party consultant using the DNR Aquatic Plant Treatment Evaluation Protocol <http://www4.uwsp.edu/cnr/uwexlakes/ecology/APM/Appendix-D.pdf>: controlling Eurasian Watermilfoil with aquatic herbicide treatments; and implementing an aquatic invasive species prevention and control strategy that includes attending the WI Lakes Convention, AIS surveillance and hand pulling. Annual progress reports and a final report summarizing the three-year project will be provided to DNR. Any publications produced as part of the project will incorporate the \201CStop Aquatic Hitchhikers!\201D brand (partnership details can be found at <http://www.protectyourwaters.org>). If consultant is to provide the final report, it is recommended that the Grantee provide the DNR Aquatic Invasive Species Coordinator with a draft for comment on report adequacy prior to making final payment to the consultant. DNR will be provided both paper and electronic .pdf copies of the final report along with, or prior to, submission of grantee\2019s final payment request. All information associated with this project is subject to public record.

**Objective:**

**Comments:** Grantee is KELLY LAKE ADVANCEMENT ASSOC

Title	Description	Author	Published	Comments
2014 AIS Monitoring & Control Strategy Assessment Report [Kelly Lake, Oconto County]	2014 EWM control had mixed results, but EWM population has not rebounded since 2013 herbicide treatment. Due to low levels of EWM in the waters of Kelly Lake, it is recommended that hand harvesting be used for removal of EWM and not herbicide treatment.	Onterra, LLC	2/15/2015
