

**Wisconsin Department of Natural Resources
SWIMS Project Summary****General Project Information**

Project ID: TK02_WTPLAN

Name: East Twin River (TK02) Watershed Planning

Type: Water Quality Planning

Subtype: Targeted Watershed Plans

Status: ACTIVE

Start Date: 1/1/2014

End Date: 12/31/2016

Purpose: The East Twin River WQM Plan was monitored in 2015 and updated in 2017-2020. This watershed is bordered on the east by Lake Michigan in Kewaunee and Manitowoc counties and is 117,493 acres in size.

The watershed contains 314 miles of streams and river, 12,446 acres of lakes and 14,181 acres of wetlands. The watershed is dominated by agriculture (75%) and wetlands (12%) and is ranked high for nonpoint source issues affecting streams, lakes and groundwater.

Objective: [About Wisconsin Year 2020 TWA Water Quality Plans and Reports]

Comments:

Outcome: Watershed specified for planning and assessment purposes. Assessment of water quality condition in this respective county will use protocols described in WisCALM of the year of assessment. Minimum assessment work includes biological data (macroinvertebrates, fish indices), chemistry and habitat data.

Additional work includes identification of priorities and goals, creating recommendations for actions, and updating narratives for watersheds and waterbodies. Assessments are to be double checked by at least one additional biologist.
