

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: AEPP-421-14

Name: DOOR COUNTY: Door County AEPP

Type: Aquatic Invasives Grant

Subtype: Aquatic Invasives Education

Status: COMPLETE

Start Date: 10/1/2013

End Date: 12/31/2015

Purpose: Door County Soil and Water Conservation Department proposes to conduct education, prevention and planning activities to control and prevent the spread of aquatic invasive species (AIS) within Door County during the period of 2014-2015. The project elements and deliverables are specified in the Door County Aquatic Species Grant application dated 7/30/2013, and revised on 10/03/2013. The project includes work that will be conducted on a Statewide AIS Source Water with 50% or more of the time being spent on Lake Michigan. The Door County AISC will participate in the Fourth of July Landing Blitz, continue to install new State AIS signs and continue partnerships with local law enforcement regarding NR 40 issues. Monitoring and mapping of aquatic invasive species will continue throughout the project as well as conducting 200 hours of CBCW per year. Annual progress reports and a final report summarizing the project will be provided to the DNR.

If a consultant is to provide the final report, it is recommended the Grantee provide the DNR AIS Coordinator with a draft for comment on report adequacy prior to making final payment to the consultant. DNR is to receive both paper and electronic pdf copies of the final report along with, or prior to, submission of grantee's final payment request. Any publications or signs produced as part of this project will incorporate the \201CStop Aquatic Hitchhickers!\201D brand.

Objective:

Comments: Grantee is DOOR COUNTY

Door County AIS AEPP Grant Application		Greg Coulthurst	7/30/2013	
Door County Aquatic Invasive Species Education, Prevention, and Planning Annual Progress Report.	Annual progress report	Door County Soil and Water Conservation Department	12/31/2014	
Door County Aquatic Invasive Species Education, Prevention, and Planning Final Report	For this project it was SWCDs intent to maintain and improve both the water and habitat quality of Door County's shorelines, wetlands, and inland lakes. Goals were to be achieved through mapping of invasive species, organizing public workshops for education, conducting water craft inspections, and developing prioritized control plans for NR 40 and other high concern invasive aquatic plants. The following goals and accomplishments are primarily reported by the DCIST coordinator as required in the Door County contract to coordinate invasive species education. This report will focus on each of the categories and deliverables mentioned in the original application and grant agreement, and will highlight activities and accomplishments for each of the two grant period years.	The Nature Conservancy	1/15/2016
