Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: NKE67

Name: Minoqua-Woodruff Lakes PWS Plan - Nine Key Element Plan

Type: Water Quality Planning
Subtype: Priority Watershed Plan

Status: COMPLETE

Start Date: 10/1/1994 **End Date:** 12/31/2003

Purpose: The Minoqua-Woodruff Lakes Priority Watershed Project plan assesses the nonpoint sources of pollution in the Minoqua-

Woodruff Lakes Watershed and guides the implementation of nonpoint source control measures. These control measures are needed to meet specific water resource objectives for the Minoqua-Woodruff Lakes Priority Watershed Project area. The purpose of this project is to reduce the amount of pollutants originating from nonpoint sources that reach surface water and

groundwater within the Minoqua-Woodruff Lakes Priority Watershed Project area.

Objective: The primary objective of the project is to reduce nonpoint source pollution to the surface water and groundwater, and to

enhance and protect the water quality of streams in the Minoqua-Woodruff Lakes Watershed. Minocqua and Kawaguesaga Lakes are showing signs of degredation from phosphorus inputs from construction site erosion, urban stormwater runoff, and

impacts from lakeside development.
