

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: East_TWA_6_2016

Name: Pine and Calvin Creek Frontal Lake Michigan TWA WQM Plan, 2017

Type: Targeted Watershed Approach

Subtype: Planning (WQ, Nine Key Element)

Status: COMPLETE

Start Date: 5/1/2016

End Date: 12/31/2018

Purpose: Targeted watershed assessment for the Pine Creek subwatershed under the planning category. Assess the overall chemical, physical and biological condition of both Pine Creek and Calvin Creek which discharge to Lake Michigan.

Objective:

Comments:

Outcome:

Study Design: Monitoring will consist of the following:

- 1. Six monthly water chemistry samples during the growing season for TP, N, and TSS.
- 2. Continuous temperature meters at two locations during the growing season .
- 3. Quantitative and qualitative habitat assessments.
- 4. Fish surveys at six locations.
- 5. Macroinvertebrate samples at six locations.
- 6. Diatom samples at two locations.

QA Measures: Standard DNR and SLOH protocols will be followed.

12/10/2016	Mary Gansberg	Progress: 50-75% Complete	All data generated entered in SWIMS. Draft report started.

Project Status Detail

Actions

Wisconsin Department of Natural Resources SWIMS Project Summary

Action	Detailed Description	Start Date	End Date	Status
Monitor Targeted Watershed Area (TWA)	Targeted watershed assessment for the Pine Creek subwatershed under the planning category. Assess the overall chemical, physical and biological condition of both Pine Creek and Calvin Creek which discharge to Lake Michigan.	5/1/2016	12/31/2016	COMPLETE
Monitor Water Quality or Sediment	Targeted watershed assessment for the Pine Creek subwatershed under the planning category. Assess the overall chemical, physical and biological condition of both Pine Creek and Calvin Creek which discharge to Lake Michigan.	5/1/2016	12/31/2016	COMPLETE
Monitor Fish Community	Targeted watershed assessment for the Pine Creek subwatershed under the planning category. Assess the overall chemical, physical and biological condition of both Pine Creek and Calvin Creek which discharge to Lake Michigan.	5/1/2016	12/31/2016	COMPLETE
Natural Community Review or Change	Natural Community validation or recommended changes or updates based on analysis of fish species found in recent surveys: Station 10045061, Calvin Creek 200 meters DS South 26th Street was modeled as a WARM HEADWATER but is recommended as a Cool Warm Headwater based on the 2017 Natural Community temperature evaluation analysis tool.	1/16/2018		PROPOSED
Monitor or Assess Watershed Condition	Assess the condition of all the lakes within the Pine and Calvin Creeks Subwatershed since this study only focused on streams.	1/16/2018		PROPOSED
Natural Community Review or Change	Station 10044972, Calvin Creek 15 meters US Clover Road was modeled as WARM HEADWATER but is recommended as a Cool Warm Headwater based on the 2017 Natural Community temperature evaluation analysis tool.	1/16/2018		PROPOSED
Natural Community Review or Change	Station 10045063, Pine Creek 25 Meters US Gass Lake Road was modeled as a WARM HEADWATER but is recommended as a Cool Warm Headwater based on the 2017 Natural Community temperature evaluation analysis tool.	1/16/2018		PROPOSED
Natural Community Review or Change	Station 10016013, Pine Creek above Cth U was modeled as a WARM HEADWATER but is recommended as a Cool Cold Headwater based on the 2017 Natural Community temperature evaluation analysis tool.	1/16/2018		PROPOSED
Monitor or Propose 303(d) Listing	Calvin Creek should be added to the state's 303d List of impaired waters due to the total phosphorus concentrations exceeding the WisCALM guidance.	1/16/2018		PROPOSED

Monitoring Stations

2016 Total Phosphorus Monitoring Report - Calvin Creek at CTH LS	This project is a targeted watershed assessment for the Pine Creek subwatershed under the planning category. The goal is to assess the overall chemical, physical and biological condition of both Pine Creek and Calvin Creek which discharge to Lake Michigan. WAV Volunteers were selected to monitor total phosphorus levels at two sites in the Pine Creek subwatershed for this project.	Ilana Haimes	1/10/2017
