

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: East_TWA_4_2017

Name: Pipe Creek TWA 2017-2018

Type: Targeted Watershed Approach

Subtype: Effectiveness (BMP, Other)

Status: COMPLETE

Start Date: 7/1/2017

End Date: 6/30/2018

Purpose: This project will evaluate water quality improvement/preservation efforts made in the Pipe Creek Watershed by Fond Du Lac County LWCD and NRCS.[TWA HUC12-040302030303]
This is a Section 319 project.

Objective: This project will provide the water quality assessment to evaluate the effectiveness of watershed BMPs in the Pipe Creek Watershed on the East side of Lake Winnebago. In 2016, Fond Du Lac County LWCD received a Great Lakes Commission grant (\$175,728) to reduce the phosphorus and sediment load in the Great Lakes, specifically the Pipe Creek Watershed. This project will provide the water quality data to determine whether or not the watershed improvements reduced the nutrient and sediment load to Pipe Creek and its downstream receiving waters. Eight locations will be monitored Total Phosphorus, Total Suspended Solids, Fish, Macroinvertebrates, Diatoms, Habitat, and Temperature. In addition, this monitoring will serve as follow-up monitoring for a fish kill in Pipe Creek in 2014 from a CAFO in the watershed.

Five WBICs will be sampled during this project: 3000189, 132800, 5025714, 5025580, 5025742.

Comments:

Outcome: Water quality monitoring will be conducted at 8 locations and final report written by 12/31/2018. This data will provide insight into the effectiveness of best management practices by a Great Lakes Grant.

Study Design: Aquatic macroinvertebrates will be collected at 8 locations in October 2017 (FY18). One day of sampling and 1 day to represerve and transport to UWSP. All data will be entered into SWIMS database by UWSP staff by 12/31/2018. Qualitative Habitat surveys will be conducted at 8 locations in FY18. Habitat data will be collected at each location during fish surveys and 1 day is needed to enter the data into database. All data will be entered into FMDB by Water Resources staff by 12/31/2017. Fish surveys will be conducted at 8 locations in FY18. Three days of sampling will be needed to complete the field surveys from July through September 2017. All fish data will be entered into the FMDB by Water Resources staff by 12/31/2017. Thermistors will be deployed at 8 locations from May to October 2017 to collect temperature data. Two sampling days will occur to deploy and retrieve the thermistors. All data will be uploaded into SWIMS by Water Resources staff by 12/31/2017. Inorganic chemistry (TP and TSS) monitoring will be conducted at 6 locations. Sampling will occur twice per month May through June 2017 for TP and TSS at 6 locations. Additionally, sampling for TP will be conducted once per month July through October 2017. Thirdly, sampling for TSS will be conducted once per month in July and October 2017 at 6 locations.

QA Measures: Standard DNR and SLOH protocols will be followed. All samples will be sent to Wisconsin State Lab of Hygiene for analysis and will be entered by the lab into SWIMS by 12/31/2017. A final report will be written and attached to this project by 12/31/2018.

Wisconsin Department of Natural Resources SWIMS Project Summary

12/12/2017	DAVID BOLHA	Progress: 75-100% Complete	Pipe Creek TWA project monitoring complete. Monitoring results will be returned in summer 2018. Report will be completed by 12/31/2018.
12/13/2018	DAVID BOLHA	Final Report Needed	Baseline monitoring completed. The monitoring report has been added to the Documents section of this project. This is now a WQ Plan project.
1/16/2020	DAVID BOLHA	Public Comment Period	Pipe Creek TWA Monitoring report is completed. Water Quality Plan writeup and public comment April 2020.

Project Status Detail

Answer Set: DEFAULT

Question	Answer
1. Number of Sample Sites (Enter the station IDs if you know them).	8 sample locations; 10016803, 10042194, 10047728-10047733
2. Number of Sample Events (Indicate how many trips into the field you anticipate for this project).	17 days in the field; 8 days collecting inorganic samples, 3 days for fish, 2 days for bugs, 2 days for diatoms, 1 day of recon, 1 day for thermistor deployment.
3. Proposed Dates for Sample Collection	Biweekly sampling for TP and TSS in May and June 2017. Monthly sampling for TP and TSS July through October 2017. Fish surveys during the recommended Fish IBI period. Bugs collected in October 2017. Diatoms collected in July or August 2017. Habitat surveys conducted during fish survey period.
4. List applicable databases and who will enter data?	SWIMS: inorganic chemistry entered by WSLOH, Bugs by UWSP AEL, Temperature data uploaded by Water Resources Staff FMDB: Habitat and Fish Data by Water Resources Staff
5. Did you receive competitive projects funding in the previous year?	No
6. If yes to question 5, did you complete the projects including data entry and reports as necessary? If not, why not?	
7. Reviewer Notes: Identify questions or issues with project (use during review period)	
8. Reviewer Decision: Is this project recommended for funding?
