

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: Jordan_Creek EAP

Name: Jordan Creek EAP Project

Type: TMDL/303d Projects

Subtype: Monitor Listed Waters

Status: ACTIVE

Start Date: 3/25/2007

End Date: 12/31/2099

Purpose: NE Region Jordan Creek EAP Project. Jordan Creek, Pine Creek, and Milwaukee River, part of the Hayton Millpoint and related sediment remediation. PCB contaminated sediment and floodplain soils create an unacceptable level of risk to human health and the environment at this site. The responsible party has entered into an agreement with the state committing to the completion of the clean up, but with an indefinite timeline.

Objective:

Comments: The status of this project is unclear and EPA currently (Jan 2023) doesn't consider this a TMDL equivalent project. Removing from the TMDL status map.

Outcome:

Study Design:

QA Measures:

Action	Detailed Description	Start Date	End Date	Status
TMDL Monitoring	The Hardies Creek TMDL is a product of a partnership between the Wisconsin Department of Natural Resources (WDNR) and the Galesville-Ettrick-Trempealeau High School (GET) Science Department. In 2004, the WDNR provided funding, through a local water quality assistance grant to GET, to support supplemental data collection for the development of the TMDL. In coordination with WDNR field staff and under the direction of Mr. Jon Johnson (GET Science Teacher), students monitored habitat, macroinvertebrates, and water chemistry and assisted with fish electro-shocking in Hardies creek. Some of the information collected by students with WDNR supervision was used in the development of this TMDL.	2/25/2008	6/30/2007	IN_PROGRESS
