The Hancock Lake Association (HLA) is sponsoring a project which will focus on creating an aquatic plant management plan and an adaptive management plan using existing water quality, fisheries, aquatic plant, shoreland, and watershed data and new lake user survey data. The Project has the following goals/activities: 1) Compile existing data on the lake and watershed; 2) Conduct a early season curlyleaf pondweed survey; 3) Apply to the Wisconsin Lake Modeling Suite to the watershed information; 4) Identify watershed threats to the lake; 5) Educate lake users through various outlets; 6) Conduct a lake user survey; and 7) Develop a lake adaptive management plan and aquatic plant management plan.
