

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: NER_07_CMP11

Name: Point Creek Initial Impairment Assessment [NER_07_CMP11]

Type: TMDL/303d Projects

Subtype: Identify Impaired Waters

Status: COMPLETE

Start Date: 7/1/2010

End Date: 6/30/2011

Purpose: This project is to do an initial assessment on Point Creek to determine if there are any impairments and if additional data are needed to determine if the creek should be added to the impaired waters list. The timing of this project is excellent because the fisheries folks will be assessing the fish community in Point Creek this summer so this monitoring can be used in conjunction with the fish data to determine the current overall stream health.

Objective: Macroinvertebrate samples will be collected in fall at 3 sites; a continuous temperature probe will be installed for one month in the summer; qualitative habitat surveys will be conducted at 3 sites, and fish survey will be conducted by fisheries staff at 3 sites in summer. All data will be entered in SWIMS and a report generated by June, 2011.

Comments: Project Category 4: New Projects

Outcome: Performance Measures: These are milestones that will be reported on in the Division Quarterly Report. Please estimate dates in a manner that encourages success.
 1) Number of sample sites associated with the project. 3
 2) Number of sampling events associated with project. 2
 3) Estimated date when sample collection will be complete. 12/31/2010
 4) Estimated date when all data will be entered into appropriate database. 06/30/2011
 5) Estimated date when final report will be complete. 06/30/2011

Project Statuses

Date	Reported By	Status	Comments
12/7/2010	MOLLI MACDONALD	Progress: 25-50% Complete	This project has 4 sites listed but only 3 in the project description. There are 3 scheduled field events from September. No complete data. Need January status update.
6/27/2011	Mary Gansberg	Progress: 75-100% Complete	All data collected as planned and draft report started. Final report and continuous monitoring data will be uploaded into SWIMS when finalized. Recommendations were made in WATERS.
1/10/2012	Mary Gansberg	Complete	Final report completed. Still need to upload continuous DO and temperature data but waiting on Lisa Helmuth to make it available for our multiprobe units.
