

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID: SCR_09_CMP12

Name: Silver Spring PI Project - Water Chemistry

Type: TMDL/303d Projects

Subtype: Refine Load Estimates

Status: COMPLETE

Start Date: 5/1/2011

End Date: 10/31/2012

Purpose: Silver Spring Creek in Lafayette County is on the state's list of impaired waters due to habitat degradation from sediment. In 2010, a project was initiated to monitor phosphorus and sediment loads entering the stream. The project will then look to manage upland sources of sediment and nutrients in order to improve water quality and eventually remove the site from the impaired waters list.

Objective: This project specifically looks to continue monitoring of sediment and nutrient loads at 5 sites in the watershed during the growing season in accordance with WISCALM guidance. Since there is no USGS gauging station on this stream. water chemistry data will be necessary to determine the success of this project. This proposal continues collection of water chemistry data in accordance with WISCALM guidance and expands it to include several contributing tributaries in the watershed.

Comments: Project Category 2: 303(d) Impaired Waters List Project

Outcome: 5 sites will be assessed once per month during the growing season (May - October). Total suspended sediment, phosphorus, and the nitrogen series will be analyzed.

Data will be entered into SWIMS.

Study Design: 5 sites will be assessed once per month during the growing season (May - October). Total suspended sediment, phosphorus, and the nitrogen series will be analyzed.

Data will be entered into SWIMS.

QA Measures:

People						
Name	Role	Status	Start Date	End Date	Organization	Comments
AMRHEIN, JAMES F	PROJECT_LEAD	COMPLETE	5/1/2011	10/31/2012	Wisconsin DNR	Samples will be collected by a volunteer.

Project Statuses			
Date	Reported By	Status	Comments
1/28/2011	MOLLI MACDONALD	Proposed	
1/19/2012	JAMES AMRHEIN	Complete	Water chemistry samples were collected during the growing season of 2011 as planned. All data has been entered into SWIMS. A summary of data has been shared with partners.

Actions				
Action	Detailed Description	Start Date	End Date	Status
Monitor or Assess Watershed Condition	This project specifically looks to continue monitoring of sediment and nutrient loads at 5 sites in the watershed during the growing season in accordance with WISCALM guidance.	5/1/2011	10/31/2012	COMPLETE
