

Final Report Form 3400-189 (rev. 7/30/09)

- Targeted Runoff Management Grant Program (ch. NR 153)
- Notice of Discharge Program (ch. NR 153)
- Urban Nonpoint Source & Storm Water Management Grant Program (ch. NR 155)

NOTICE: This Final Report is authorized under ss. 281.65 and 281.66., Wis. Stats., and chs. NR 153 and NR 155, Wis. Admin. Code. Personally identified information collected will be used for program administration and may be made available to requesters as required under Wisconsin Open Records Law [ss. 19.31-19.39, Wis. Stats.].

INSTRUCTIONS: Your grant agreement requires you to submit a Final Report with your final reimbursement request. This Final Report form must be used in conjunction with the "FINAL REPORT INSTRUCTIONS." The instructions detail how to complete and submit the report to DNR as described in the instructions.

2. PROJECT NAME & LOCATION.

2.1. Project Name: Grabian Farm Runoff	2.2. Grant Number: TRC-GB04-38000-13D
2.3. Governmental Unit Name: Marinette County LWCD	2.4. Primary Watershed Name: Little River
	2.5. Watershed Code: GB04

NOTE FOR SECTION 2.6 (which follows):
 Section 2.6. includes five (5) columns (A. through E.) for recording data about five (5) discrete site locations. If your grant has more than five (5) discrete project locations, attach additional columns for Section 2.6 as described in the instructions. If your project occurs in more than one 12-digit Hydrologic Unit Code (HUC), use the space in adjacent columns to record other HUC numbers.

5. Additional Information. (Space will expand to fit your text.)

LWCD staff visit all TRM project sites annually to ensure operation and maintenance of the BMP's. There have been no contaminated runoff events related to this farm since the application was completed for this project.

6. Summary of Project Challenges. (Space will expand to fit your text.)

During the writing of the application we had planned to monitor stream segments affected by the project. Unfortunately, the site and the nature of the BMP's installed do not lend themselves to direct monitoring. The barnyard does not drain to stream, but to a wetland complex. This leaves no place to monitor where the Family Level Biotic Index would be valid. The overall goals of the project, to collect all manure and contaminated runoff for proper incorporation, do not lend themselves to the type of monitoring we described.

By ending winter spreading of manure we eliminate the chance of the catastrophic runoff events and associated well contamination and fish kills. A couple widely spaced sampling events do nothing to measure the successful installation of a manure storage and ending the spreading of manure on snow covered, saturated, or frozen ground.

Based on better understanding of nature of the practices these projects install vs the type of monitoring we can reasonably be expected to perform, the LWCD has ceased putting monitoring proposals in our applications.

However, we would like to work with DNR do develop a water quality monitoring regime that will accurately characterize county lakes and streams regarding their positive or negative impacts on people and wildlife.
