5. Additional Information. (Space will expand to fit your text.)

DNR has not yet issued a letter of satisfaction. The new manure storage unit is installed, the danger signs are up, the fence is installed and the side slopes have been seeded and mulched.

6. Summary of Project Challenges. (Space will expand to fit your text.)

The biggest challenge was installing the new manure storage unit before the ground froze. The old manure storage structure had to be removed before the new structure could be installed in its place. The fencing of the manure storage unit was delayed until late April this year because the ground was frozen and fence posts couldn't be put in the ground. There were also challenges with getting the county partial reimbursement. The request was sent in the middle of January. We did not receive payment until early to mid April (almost 12 weeks).
