I have had trouble with the
 tester placed in the City Park
 The first one was attached to the
 Pier with a rope. Someone cut
 the rope but we were able to retrieve
 it from the water. The next time
 we couldn't find it and you replaced it
 I then attached it with a chain and
 Radlock. Sometime in August someone cut
 the chain and we can't locate it.
 Should we try to put another one at
 that location or forget about it?
