

Date 6/26/2000

Facility Name Howards Johnson's

Receiving Water Kilboen Road Ditch

Evaluated by Wm Newzyn

This stream classification is not included in the revised code because (select one):

The discharger is no longer at this location.

A new classification has resulted in a full fish and aquatic life designation.  
New survey date \_\_\_\_\_ Please provide copy of new classification report.

This receiving water should be added to the database and to the code. Specify information, as it should be included in code.

# CORRESPONDENCE/MEMORANDUM

Date: September 15, 1982  
To: Central Office - Madison  
From: Joe Kurz JEK  
Subject: Howard Johnson's Effluent Limits

File Ref: 3200  
(Jim Schmidt - WRM/2)

I've conducted a minimal field investigation and also a search of our fish distribution data files to determine the stream classifications for the three streams in the vicinity of Howard Johnson's. Under the new classification scheme, all three streams, the Des Plaines River main stem, the Des Plaines River Center Branch and the Kilbourn Road Ditch, are classified as Use Class B in the vicinity of Howard Johnson's. This means they are capable of supporting warm water sport fish and thus full fish and aquatic life standards apply.

I have also conducted a check of the Pleasant Prairie Ditch classification. A report is included on this in a separate memo.
