Subject: Unnamed Tributary to Lake Michigan - Kewaunee Nuclear

This will confirm the verbal agreement that was reached on September 20, 1984, concerning discharge limits for Wisconsin Public Service - Kewaunee Nuclear Plant.

As a result of your request to them this facility will probably be engaged in some form of improvement work on their sewage treatment plant. In order to properly plan that work discharge limits must be known. To that end we surveyed the stream and determined that the existing 30/30 limits are appropriate.
