RE: NR 151 Water Quality Performance Standard Issue's!

Dear Mr. Healy

This letter is to inform you that your livestock operation will have satisfied the following agricultural performance standards regarding the State of Wisconsin NR 151 Water Quality Performance Standards. With your cooperation we are on the way to addressing issues related to **NR 151.05** (*MANURE STORAGE STRUCTURE PERFORMANCE STANDARDS*), **NR 151.055** (*PROCESS WASTEWATER HANDLING PERFORMANCE STANDARD*), **NR 151.06** (*CLEAN WATER DIVERSION PERFORMANCE STANDARD*), **NR 151.07** (*REQUIREMENT TO DEVELOP AND LAND APPLY NUTRIENTS IN ACCORDANCE WITH A 590 NUTRIENT MANAGEMENT PLAN*), and **NR 151.08** (*MANURE MANAGEMENT PROHIBITIONS*). You have implemented a portion of these requirements and are required to come into full compliance by December 31st 2015 for your facility. Full compliance for NR151.07 and NR151.055 (Milk house processed waste water) has been achieved and compliance for these practices must be maintained in perpetuity regardless of future cost-sharing.

Again, thank you for your cooperation and financial input into these completed projects and for your commitment to finalize the completion of the remaining projects next year.

If you have any question please feel free to contact

me. Sincerely,

Todd Rietmann, Conservation Specialist
Columbia County Land & Water Conservation Department
