

ANTIGO, LANGLADE COUNTY

Wastewater Receiving Stream Classification

The Antigo sewage treatment plant discharges to Spring Brook, which has a low flow of 3.6 cfs. Above the City of Antigo, there are several locations where Spring Brook widens to form small ponds. In several of these ponds and immediately below the dam in Antigo, brook trout are found. Below the dam, Milbrew, Inc., Baker Canning Company, and Kraft Company all discharge to Spring Brook above the sewage treatment plant outfall.

in Antigo

There is only limited agricultural usage above Springbrook Road, with the area below Springbrook Road having heavy agricultural use. Non-point sources affect the stream in the vicinity of Dorr Street. Fish have been observed above the sewage treatment plant outfall and from Springbrook Road downstream.
