Beaver Dam Lake Tributary

Fox Lake sewage treatment plant discharges into Beaver Dam Lake Tributary. The stream flows through a large marsh before entering Beaver Dam Lake; thus it is valuable as a northern pike spawning ground. Panfish have also been seen in portions of it.

Recommendations

From the Fox Lake sewage treatment plant outfall and for the remainder of Beaver Dam Lake Tributary, the classification should be continuous fish and aquatic life.

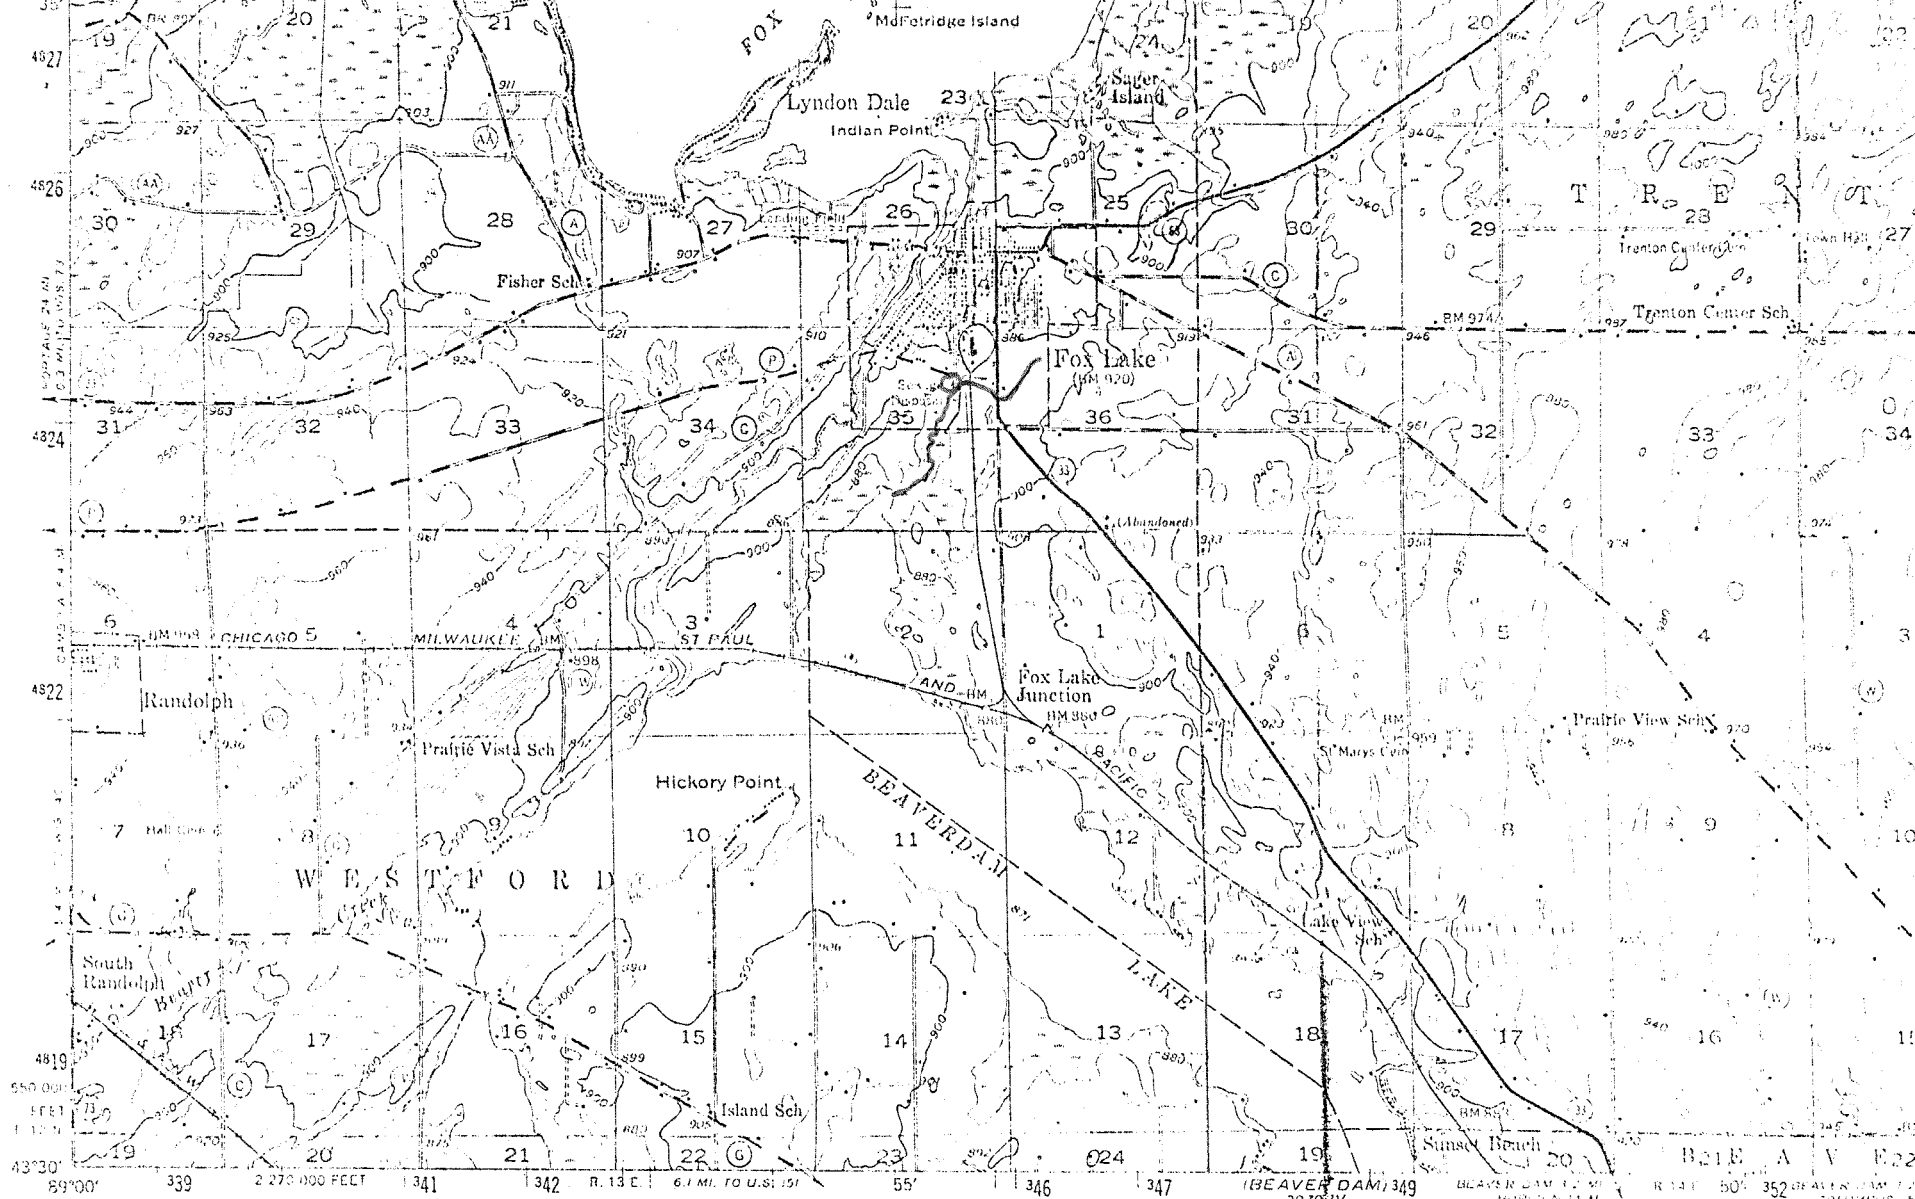

The above recommendations represent a concurrence of opinion of the stream classification team who are as follows:

Robert Weber - District Engineer
Jim Congdon - Area Fish Manager
Tom Bainbridge - District Biologist
Roger Schlessler - Natural Resources Technician

Respectfully submitted,

Thomas Bainbridge
Stream Classification Coordinator
