

Department of Natural Resources

INTRA-DEPARTMENT

MEMORANDUM

Wisconsin Rapids
Station

Date: October 8, 1976

IN REPLY REFER TO: 3410

TO: File

FROM: Kenneth W. Schreiber

SUBJECT: Yellow River in Vicinity of Sewage Treatment Facility of
Westview Country Club

On September 30, 1976 the writer conducted a survey of the subject area.

A direct sewage discharge into the river was not located, however, a slight degree of surface scum and algae was noted in the river directly below the sewage facility.

The surrounding stream area appeared to be of good quality with an abundance of aquatic life.

Approximately 500 yards downstream from the sewage facility the river discharge was determined as 1.64 CFS.
