5. Additional Information. (Space will expand to fit your text.)

Constuction work for the Johnson Park Streambank stabilization project was completed in the Summer of 2014. Work included grading and stabilizing previously identified eroded banks with a more gradual side slope. Banks with stabilized with a rock toe and native plantings along the bank.

6. Summary of Project Challenges. (Space will expand to fit your text.)

There was a lot of concrete slabs tied together with rebar along one section of the streambank. Though shown on the plan, it was a much larger area than anticipated and had large diameter rebar which made removal difficult.
