5. Additional Information. (Space will expand to fit your text.)

Project has already received good public exposure as an example of how urban stormwater ponds can serve a multi-purpose role within the community. In this case, the pond has demonstrated the ability to serve as a course feature on a public golf course that adds to the experience of golf course users while providing water quality and flood control benefits.

6. Summary of Project Challenges. (Space will expand to fit your text.)

There were no major challenges encountered during project construction. The relatively cold, wet spring of 2013 resulted in fairly slow progress until summer of 2013, but the project was completed on time.

7. Grantee Certification.

Checking here certifies that, to the best of your knowledge, the information contained in this report is correct.
