Secretary Federal Energy Regulatory Commission 888 1st Street, N.E. Washington, D.C. 20426 (VIA ELECTRONIC FILING)

Stevens Point Hydroelectric Project, FERC No. 2110 – Article 405, Exotic Species Biennial Monitoring Report – 2010/2011

Dear Secretary:

In accordance with the order approving the Exotic Species Control Plan, Consolidated Water Power Company (CWPCo) is filing the monitoring report for 2010/2011.

CWPCo conducted monitoring during the summers of 2010 and 2011 on the Project. Inspections were completed by vehicle and boat (where necessary). No observances of Eurasian milfoil or curly-leaf pondweed were noted.

Purple Loosestrife was observed sporadically. Administered purple loosestrife control methods were:

- 1. For smaller colonies (less than 5 plants) without observed beetle activity removed plants to best extent possible and disposed of.
- 2. For colonies with observed beetle activity either
 - a. removed flower tops, leaving rest of plant for beetles to feed on and populate.
 - b. removed flower tops, leaving rest of plant for beetles to feed on and populate, <u>plus</u> place Wood County Conservation raised beetle pots below Stevens Point Dam spillway on river's west shoreline during 2011.

Two new purple loosestrife site locations were located in 2010 and added to the six locations referenced in the 2008/2009 monitoring report. Both new sites were small colonies of less than 5 plants, of which one was observed with no plants in 2011. Overall, the purple loosestrife plant counts were similar to the 2008/2009 counts, with many sites observed with beetle activity. The purple loosestrife levels do not demonstrate any significant negative effects to fish or wildlife populations.

Information about invasive species is provided along with the distribution of our recreational brochrures which are free to the public.

CWPCo operating and maintenance personnel informally monitor for the presence of zebra mussels during the course of their normal work duties. No zebra mussel observations were reported in 2010 or 2011.

Sincerely,

CONSOLIDATED WATER POWER COMPANY

Thomas J. Witt

Purple Loosestrife Monitoring Data - 2010 and 2011

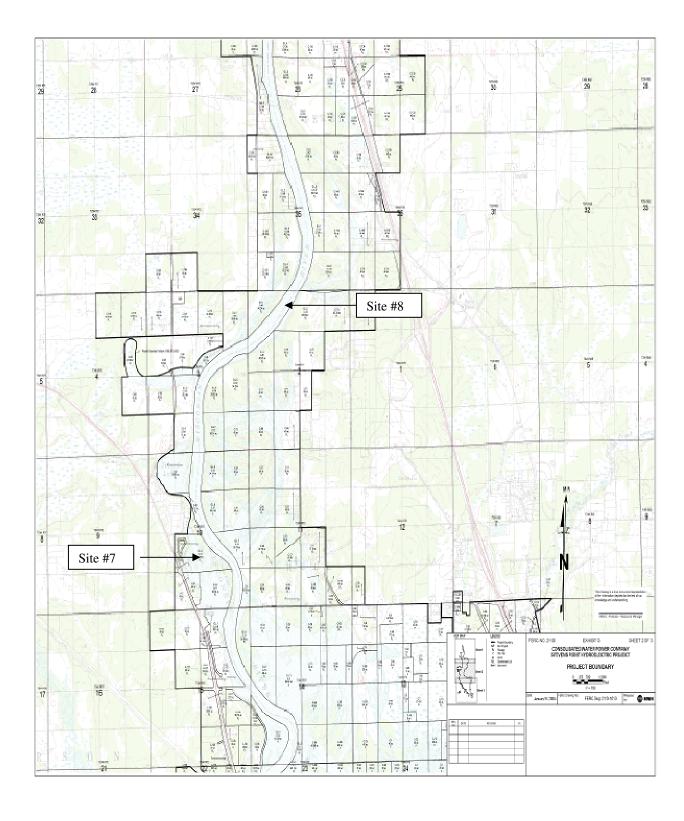

<u>Table 1 – Purple Loosestrife Monitoring Site Data</u>

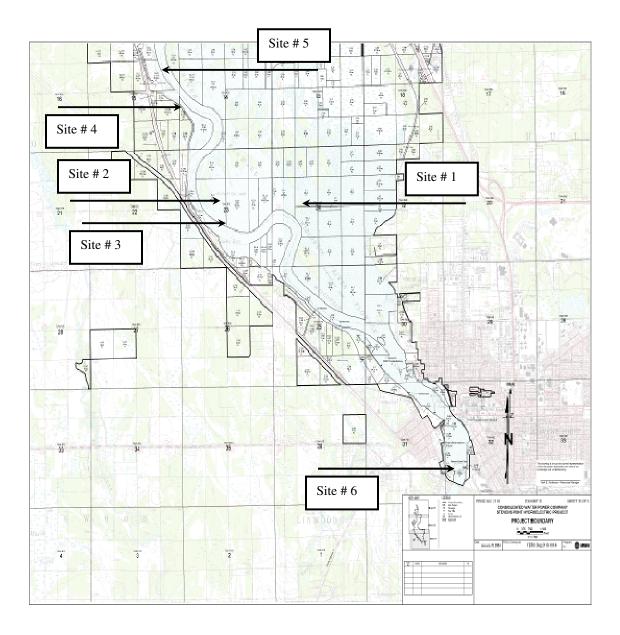

Stevens Point Hydroelectric Project – Purple Loosestrife Monitoring for 2010 / 2011

Site	Description	GPS Coordinates	Plt Density	Beetle	Chem	Action Taken
No				Activity	Applied	
1	Small island In center of main reservoir	16T 0291958 4935997	5 plts	Heavy	No	2010 – removed flower tops, rest for beetles
			3 plts	Heavy	No	2011 - removed flower tops, rest for beetles
2	Small island NW of main	16T 0290637 4936278	15 plts	Heavy	No	2010 – removed flower tops, rest for beetles
	reservoir near main channel		12 plts	Heavy	No	2011 - removed flower tops, rest for beetles
3	Sand bar south of Site	16T 0290469 4935927	12 plts	Heavy	No	2010 – removed flower tops, rest for beetles
	#2		9 plts	Heavy	No	2011 - removed flower tops, rest for beetles
4	W. shoreline of main	16T 0289899 4937064	2 plts	None	No	2010 - removed plants
	channel		None		No	2011 - no plants
5	Small island along W.	16T 0289548 4937742	30 plts	Heavy	No	2010 – removed flower tops, rest for beetles
	shoreline & main channel		20 plts	Heavy	No	2011 - removed flower tops, rest for beetles
6	Bedrock below	16T 0294296 4932408	30 plts	Light	No	2010 - removed flower tops, rest for beetles
	spillway W. side		25 plts	Light	No	2011 - removed flower tops, rest for beetles, 2 pots planted
7	Small island across from	16T 0289053 4938540	4 plts	Medium	No	2010 – removed flower tops, rest for beetles
	old STH 10 recreation site (CTH HH)		2 plts	Medium	No	2011 - removed flower tops, rest for beetles
8	E. shoreline, 0.5 miles	16T 0289766 4941127	1 plts	None	No	2010 – removed plant
	downstream new STH 10 recreation site		None			2011 – no plants

Notes: No chemical applications for 2010 or 2011. Beetle activity rating based on percentage of leaves with beebee holes from beetle feeding: light less than 15%, medium 15% to 30%, heavy greater than 30%.
