

Instructions: Bold fields must be completed.

| Location Name | WBIC | County | Date(s) | AIS sign? | Secchi (ft or m) | Conductivity (ZM) ≥ 99 umhos/cm | Collector(s) | Start Time | End Time | Total Hours (hrs x # ppl) |
|---------------|--------|----------|---------|-----------|------------------|--------------------------------------|----------------------------|------------|----------|---------------------------|
| Offawa Lake | 822200 | Waukesha | 7/23 | Y | 9.25 | | Amanda Pedraza Samantha | 12:00 | 2:00 | 4 |

STEP 1: Circle species that you looked for and review the Identification Handout.

| AQUATIC PLANTS/ALGAE | | Water hyacinth | | Water chestnut | | Purple loosestrife | | INVERTEBRATES | | Other (please specify) | |
|-----------------------|---------------------|------------------------|-----------------|----------------|----------------|--------------------|-------------------|-----------------------|--------------------------|-------------------------------|--|
| European frogbit | Curly leaf pondweed | Water lettuce | RIPARIAN PLANTS | Water chestnut | Flowering rush | Yellow flag iris | Japanese knotweed | Zebra/quagga mussels | Faucet snails | Chinese/Banded mystery snails | |
| Yellow floating heart | Fanwort | Eurasian water milfoil | Phragmites | Flowering rush | Phragmites | Japanese knotweed | Japanese hop | Asian clam | Rusty/red swamp crayfish | | |
| Brazilian waterweed | Parrot feather | Didymo | | | | | | New Zealand mudsnails | Spiny/fishhook waterflea | | |

STEP 2: Record locations of sampling sites (in decimal degrees). Indicate whether snorkeled or why not. List AIS found and density at each site or record none. Collect a sample of any new AIS found. Collect five new invasive plant specimens, 20 Dreissenids, and up to 3 of each invertebrate species. Include internal and external labels with WBIC, name of lake, county, sample date, sample type (snails, spiny water flea or zebra mussel) and collector. Legibility is appreciated. If needed, preserve with adequate ethanol.

| Site* | Latitude | Longitude | Snorkel (Y/N) | If no, indicate why† | Species name, density (1-5)‡, and live (L) or dead (D)§ | Sample (Y/N) | Photo (Y/N) | No AIS | Comments |
|-------|----------|-----------|---------------|----------------------|---|--------------|-------------|--------|----------|
| T51 | 42.9320 | 88.48096 | Y | | SPINY MUD / 2 UNKNOWN SNAIL | Y | | | |
| T52 | " | 88.47902 | Y | | | | | ✓ | |
| T53 | 42.9321 | 88.47993 | Y | | SPINY MUD / 1 UNKNOWN SNAIL | Y | | | |
| T54 | 42.9385 | 88.48059 | Y | | | N | | ✓ | |
| T55 | 42.9399 | 88.48248 | Y | | SPINY MUD / 3 | N | | | |
| BL | 42.9386 | 88.48228 | Y | | SPINY MUD / 1 | N | | | |

*boat landing (BL), target site (TS), meander survey (MS).

†Stained water, turbid water, blue-green bloom, chemical treatment, other (please describe).

‡Density ratings: 1-a few plants or invertebrates, 2-one or a few plant beds or colonies of invertebrates, 3-many small beds or scattered plants or colonies of invertebrates, 4-dense plant, snail, or mussel growth in a while bay or portion of the lake, or 5-dense plant, snail or mussel growth covering most shallow areas.

§Live (L) animals will contain flesh and live plants will generally be rooted. Dead (D) animals will not contain flesh and dead plants include sterile fragments.

STEP 3: Collect Waterflea Tows from the deep hole (DH). Decant water and preserve the sample. Preserve with 4 parts ethanol and 1 part sample. Submit the sample, a completed copy of this data form, and a completed copy of the Water Flea Tow Monitoring Report (3200-128) to DNR Science Services. Legibility is appreciated.

| Latitude | Longitude | Method* | Net ring depth (m) | Net diameter† | Ethanol‡ | Samples combined (Y or N) | Date sent |
|----------|-----------|----------|--------------------|---------------|----------|---------------------------|-----------|
| 42.93978 | 88.48137 | Vertical | 3 | 50 | Y | Y | |
| " | | | | | | 11 | |
| " | | | | | | 11 | |

STEP 4: Collect vertical Veiliger Tows from 3 sites; the deep hole (DH) and two other deep areas along the downwind side of the lake. Preserve with 4 parts ethanol and 1 part sample. Submit the sample, a copy of this completed data form, and a completed copy of the Mussel Veiliger Tow Monitoring Report (3200-135) to DNR Science Service. Legibility is appreciated.

| Latitude | Longitude | Net ring depth (m) | Net diameter† | Ethanol‡ | Samples combined (Y or N) | Date sent |
|----------|-----------|--------------------|---------------|----------|---------------------------|-----------|
| 42.93978 | 88.48137 | 3 | 50 | Y | Y | |
| " | | | | | 11 | |
| " | | | | | 11 | |

*Horizontal, oblique, or vertical.
†30 or 50 cm.

#Non-denatured or denatured ethanol.

STEP 5: Coordinate voucher and sample submission and verification with regional DNR staff for all AIS records for the specific region.

- Plants will be compiled and entered into a spreadsheet to be verified and submitted to a herbarium by an in-person appointment. Please indicate which herbarium: Freckmann Herbarium, Wisconsin State Herbarium, Other _____ . Date of herbarium meeting _____ .
- Snails will be compiled with other regional snail specimens and sent to UW La Crosse. Date sent _____ .
- Dreissenids will be sent to Science Services. Date sent _____ .
- Crayfish compiled and sent to: Craig Roesler or Scott VanEgeren. Date _____ by _____ .

STEP 6: Data was entered into SWIMS on _____ by _____ .
Once data is entered, send scans of data sheets to central office (Maureen.Ferry@Wisconsin.gov and Amanda.Perdzock@Wisconsin.gov).

STEP 7: Data was proofed on _____ by _____ .

Notes:
